Welsh Research

Welsh Research

What is different in researching your Welsh and English Ancestry? At least since 1500's we have had the same Laws in England and Wales. (unlike Scotland)

Same Civil Registration

Same Census

Same Church Records

Same Wills system

Same Laws concerning Manors

etc. etc.

So what is different?

The Language

The welsh language was widely used in official documents, so some help in translation might be needed.

The names and naming systems

This is a large subject in its own right.

Limited Range of Surnames and Occupations

Place names

Unfamiliar

The range of records surviving

Unfortunately the records in Wales were not kept as well as those in England and many are missing.

Where the records are kept?

They are a spread around

Civil Registration

Basically the same as in England but with Welsh names and places

Access is the same

Indexes at Ancestry, Find My Past, FreeBMD

Certificates from Registrar General or local registry offices.

Census

Access

Same as for England - Ancestry, Find My Past, The Genealogist, Family Search, FreeCen, etc.

All schedules (the form that the head of household filled in) were available in English and Welsh

If they chose and English form they filled it in English and if Welsh, filled it in Welsh.

Or sometimes mixed!

When the Enumerator filled in the census sheets we see (1841-1901) then he translated the Welsh into English.

This led to mistakes being made.

Any field might have errors

Sample Census

In the census years 1841-1901 the original schedule sheets were destroyed so it is not possible to compare the two.

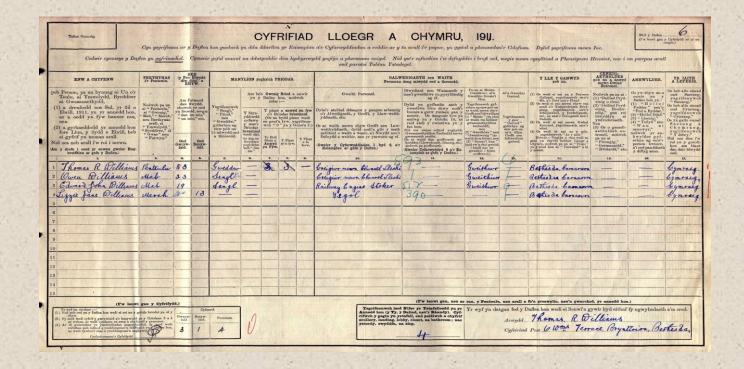

So lookout for changes between one census and the next.

How do we go about translating the 1911 census?

Fortunately someone has thought of that

1911census.co.uk

Searching the Welsh records in the 1911 census

It can be tricky to find ancestors in Wales for the following reasons:

The census may have been completed in either Welsh or English, which can make it difficult to both search for an individual and then understand any Welsh-language results that are returned

A small number of surnames and occupations account for large portions of the population, which can make it difficult to narrow down a search that returns a large number of results.

The following tips will help you search for census returns in both English and Welsh, without the need for specific knowledge of Welsh.

Search tips

When you search for an ancestor with a common Welsh surname you will almost certainly need the forename as well. If you are unable to find your ancestor with the spelling that you have, try:

Searching for variants and diminutives of the forename – even if you are sure that you have the correct spelling. The most common Welsh forenames have been added to the variants search, but you will need to refer to other sources, such as name dictionaries, for the variants of less common names, and search for them separately. The **table of Welsh forenames** may help you. It provides a list of diminutives, variants and Anglicised versions of the most common Welsh forenames, such as Gruffyd, Gruffud and Gruffydd; Aneirin and Aneurin; Alys and Alice.

If your ancestor has a Welsh forename, and you are unable to find it with any of the Welsh spellings, you should also search the Anglicised spelling

A **wildcard search** on the forename or last name will allow you to search for variations in spellings, and will also compensate for translation errors

Narrowing your search results

If your ancestor has a common name and you wish to narrow your search results you should use the numerical fields (ages and codes) or the additional name fields, as these will return results in both English and Welsh. In the first instance we recommend that you use:

your ancestor's age

names of other people in the household.

Then if you wish to narrow the results more, use the:

birthplace codes in the place of birth field

or

occupation codes in the occupation field.

Understanding the results

Translation tables

If the census form you need was completed in Welsh, you can use the translation tables to translate the most common terms into English. Tables have been provided for all the fields of the census return, though you may need to refer to other sources such as a Welsh/English dictionary if the term you find was not commonly used. For example, if your ancestor had a rare occupation, or if the form was filled out in a personalised way, such as 'assisting at Cardiff Ice Co Limited.'

You may also need to do some lateral thinking to use the translation tables, as the word you need to translate may be misspelled or it may be a grammatical mutation, so it will not appear exactly as it does on the table.

For example, the Welsh for 'sister' is 'chwaer', although the following spellings have also been found in the returns: chwaer. (with added full stop), chwair and chwoer

Grammatical mutations in Welsh cause certain letters to change at the beginning of the word. Examples of mutated forms have been found on some of the schedules, for example, berthynas for perthynas (relative) and ferch for merch (daughter).

If you can't find a word, check the following table to see how it could have mutated first, and then look for the radical (unchanged) spelling in the translation table:

Word	normally starting with the letter:	C	P	T	G	В	D	Ll	M	Rh
A 'soft	'mutation changes this to:	G	В	D	G	F	Dd	L	F	R
					omitted					
A 'nasa	al' mutation changes this to:	Ng+h	M+h	N+h	Ng	M	N			
An 'asp	oirate' mutation changes this to:	Ch	Ph	Th

Wills

Before 1858, wills were proved in church courts; all wills proved in Welsh church courts are now held by the National Library of Wales.

Wills after 1858 were proved in civil probate courts, a national system which covered all of England and Wales.

Indexes to wills from 1858, which give brief details of the will, can be found in the National Library of Wales and in some local authority archives; the wills themselves are held centrally. Bishops' Dioceses

Criminal Records

If your ancestor was in trouble with the law, you may be able to find out about their crime in the records of Quarter Sessions (which tried lesser crimes) or of Great Sessions (which tried more serious crimes).

Quarter Sessions records are held by local authority archives, while records of Great Sessions are held by the National Library of Wales.

Sometimes police records can be found in local authority archives, too, so you may be able to find a criminal ancestor's 'mug shot' or fingerprints in a register of criminals.

Employment records

Very hit and miss.

Land Tax

If your ancestors were tenant farmers, try looking at the land tax assessments (1780s to early 1830s) which list owners and tenants of properties.

Estate records are also a really useful source - they may include leases, or rent books or estate maps which list tenants and the land they farm.

Land tax assessments are usually to be found in local authority archives, while many archives hold estate records.

Welsh Names

Before record keeping began, most people only had a first name.

When record keeping started and populations / mobility increased a change was needed.

The Welsh chose a Patronymic naming system.

Patronymic surnames are based on the father's given name.

England this gave rise to names such as.

Johnson = son of John Williamson = son of William Robinson = son of Robin

In Wales they added ap or ab.

(Short for Mab = son) Ab or Ap - son

Rhys ap Dafydd = Rhys son of Dafydd Or ferch or verch (often abbreviated to vch) – daughter

Myfanwy vch Rhys = Myfanwy daughter of Rhys

The surname changed with each generation.

Be careful – if the ap or ab is missing does not mean the fixed surname.

Different naming patterns were often used in the same family. For example, Harry John's six sons were named Griffith ap Harry, John Parry, Harry Griffith, Richard Parry, Miles ap Harry, and Thomas Parry. They might equally have used the surname John(s) or Jones.

Edward Foulke was the son of Foulke ap Thomas, a descendant of Ririd Flaidd, Lord of Penllyn. He was born on 13 May 1651 and married Eleanor, daughter of Hugh ap Cadwaladr ap Rhys of the parish of Ysbyty, Denbighshire and lived at Coed-y-Foel belonging to Roger Price of Rhiwlas, before embarking for Pennsylvania, 3 February 1698.

Michael D. Jones married Anne Lloyd who inherited the Plas yn rhal estate, Rhuthun. Their eldest son, Mihangel ap Iwan, emigrated and became a doctor in Buenos Ayres, Argentina. Their second son, Llwyd ap Iwan, also emigrated to South America. He was a surveyor by profession and met with a tragic death in 1909.

Names can mutate

```
Patronymic Name - Surname

ab Ifan, ab Evan = Bevan

ab Eynon = Beynon

ap Harri, ap Harry = Parry

ap Huw, ap Hugh = Pugh

ab Hwfa = Pova, Povey

ap Hywel, ap Howell = Powell

ab Owain, ab Owen = Bowen

ap John = Upjohn

ap Rhobyn, ap Robyn = Probyn

ap Rhydderch = Prydderch, Prytherch

ap Rhys = Prees, Preece, Price

ap Richard = Prichard, Pritchard

ap Robert = Probert

ap Roger = Prodger
```

Harry John's six sons were named-

Griffith ap Harry,
John Parry,
Harry Griffith,
Richard Parry,
Miles ap Harry, and
Thomas Parry.

They might equally have used the surname John(s) or Jones.

Alternatively, the ap was simply dropped entirely.

The most common surnames in modern Wales result from adding an s to the end of the name, as in Jones, Roberts and Edwards.

Any one of the following patterns were used when adopting a surname.

The pattern used by one generation was not always used by the next generation.

Alternative Naming Patterns

Father's Given Name.

- -Using the father's given name as the surname was the most common.
- -Sometimes, the father's name was changed to serve as a surname.
- -Iago son of Rhys could have been known as Iago Rees, Iago Prys, Iago Prees, or Iago Price.

Father's Surname.

- -Sometimes a son was given his father's surname.
- -This is done today.
 - -Owen, the son of John Price, may have become Owen Price.

Grandfather's Given Name.

- -Occasionally, a family adopted the grandfather's given name as a surname.
- -For example, the surname of Thomas Pugh, son of Jasper ap Hugh is a form of his grandfather's name, Hugh.

Maternal Grandfather's Name.

- -In some areas, the mother named her first-born son after her own family, usually her father.
 - -Godfrey Prydderch married Ann Lloyd, daughter of Reece Lloyd.
 - -Their eldest son's surname is Lloyd.

Grandmother's Name.

- -An individual's surname could be based on the grandmother's family name.
- -Rees Llewelyn married Gwenllian Lloyd. Their son, Griffith ab Rhys, named his son David Lloyd.
 - -David Lloyd's descendants kept the surname Lloyd.

The Act of Union (1536) stated that all official documentation in Wales was to be carried out in the English language.

This started the conversion to fixed surnames.

Most noble families adopted surnames by the sixteenth century.

The gentry adopted them during the eighteenth century

While some farmers, tenant farmers, and workers did not take surnames until the nineteenth century or later.

Whilst most Welsh surnames are now fixed family names which have been passed down through the generations there has been a resurgence of the patronymic naming system amongst those Welsh speakers keen to preserve a patriotic history of Wales.

Limited Range of Surnames

Because of the limited range of surnames, often double surnames were used.

The second surname was added before primary surname.

These are sometimes hyphenated.

The second surnames are often place names or maternal surnames.

Solving common name problems

Many times when you are searching for someone with a common name, research can become difficult because records are not complete or are unavailable and/or there are too many people with the same name or surname.

Tips for solving common name problems

Establish an identity for your ancestor. You must know more about your ancestor than simply his or her name. A name, time period and place are critical information. Examples of other information are: Is there a farm name associated with the family? Who were your ancestor's siblings? What was his/her occupation?

Identify all records for the place or area of interest in the time period. Search those records.

Find and use available indexes to these records. Remember that indexes are often incomplete and always have errors. Verify information you find in the index with the actual record.

Make photocopies of these records as you use them. Oftentimes a piece of information you hadn't noticed when you first found the record will have significance later.

Create a database to collect the names you find. Include identifying information. Arrange it so you can sort by name, date, place, event, record type, etc. Use the database when evaluating and making decisions.

Use more than one record type for information about the individual. Using a variety of appropriate records will help you verify if you have the right person and/or give you the correct perspective on the individual or family.

Evaluate and analyse each record. The combination of what you know about your ancestor and what you learn from records will allow you to determine if it is consistent, conflicting or new information.

When you find a christening that you believe is ancestral, make sure the person named in the christening does not die before your ancestor married. If the person in the christening dies as a child, he/she cannot be your ancestor.

Search for all the siblings of your ancestor. The broader the foundation of family you lay, the easier it will be to work backwards. Oftentimes the clues you need will come from a brother or sister and not necessarily the direct ancestor.

Do blanket searches for the surname, rather than limiting your search to the immediate family. Check all possibilities of those with the same surname. You may find other family or determine that what you have may not be correct.

Trace all potential families when you have more than one with the same given and surname. This research may help you to resolve which family is really yours.

When you scan down a list of names on a record, don't limit yourself to the primary person. For example: Read the names of the bride, groom and their fathers on a marriage record post-1 July 1837. You will pick up women who are widowed with their maiden names. Be sure to read witness' names.

Using these tips will help you to clearly identify a person or family members and place them in the correct family.

Records that solve common name problems

When doing research for a person or family, it is important to search the commonly used records to begin. Those records for Wales are:

Civil Registration

Census

Church Records

After thoroughly searching those records and laying a foundation for the family using the information found in them, you should then collect identifying information from other less-used records to verify and clarify the research you have done. Use the following records after you have used the commonly used records:

Burial Records or Monumental Inscriptions (MI's)

Probate Records

Land and Property

Taxation

Compiled Pedigrees

Marriage bonds and allegations

Poor law records

Manorial Records

Court Records: Petty Sessions, Quarter Sessions, Great Sessions

Be sure to analyse and evaluate carefully each record. You may have to view a record several times to gather all pertinent information for a person or family.

Welsh words and phrases (Welsh spelling variants in brackets)

Welsh word or phrase	English equivalent
Er cof am	In memory of
Er cof an(n)wyl am	In loving memory of
Er parchus cof am	In respectful memory of
Er serchus cof am	In loving (affectionate) memory of

Clwyd Family History Society

http://www.clwydfhs.org.uk/index.htm

An excellent website with detailed information on the parishes within it's area, full details of all the war memorials for WW1 & WW2 and the men named on them, details of the Poor Law Unions and where their records are held, a list of missing censuses for 1841 & 1861 (Quite extensive and much more. Many records are held at their Resource Centre that in the Wrexham area.

Dyfed Family History Society

http://www.dyfedfhs.org.uk/
